

Play, Learn and Grow...Together!

# Ordsall Primary School

## Allergy Safety Policy

**Date reviewed:** September 2026

**Reviewed by:** Kerry Moss (Deputy Headteacher and SENCO), Tracy Rollison (SEND Manager)

**Approved by:** Karl Hopkinson (Headteacher)

**Next review:** September 2027

## Contents:

### Statement of intent

1. [Legal framework](#)
2. [Definitions](#)
3. [Roles and responsibilities](#)
4. [Food allergies](#)
5. [Animal allergies](#)
6. [Seasonal allergies](#)
7. [Allergy register](#)
8. [Adrenaline auto-injectors \(AAIs\)](#)
9. [School trips](#)
10. [Medical attention and required support](#)
11. [Staff training](#)
12. [Mild to moderate allergic reactions](#)
13. [Managing anaphylaxis](#)
14. [Monitoring and review](#)

## **Statement of intent**

Ordsall Primary School is committed to providing a safe, inclusive and supportive environment for all pupils, staff and visitors with allergies. We recognise that allergies can range from mild reactions to life-threatening anaphylaxis and are committed to ensuring that every individual with an allergy is able to participate fully in school life.

The school recognises that effective allergy management requires a whole-school approach involving pupils, parents, staff, governors, healthcare professionals and catering providers. We are committed to promoting allergy awareness, reducing the risk of allergen exposure, ensuring staff are appropriately trained and responding effectively in the event of an allergic reaction.

This policy has been updated to reflect the requirements of Benedict's Law, the Department for Education's Allergy Safety in Schools statutory guidance (July 2026) and current best practice.

## 1. Legal framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Children and Families Act 2014
- Natasha's Law (Food Information (Amendment) (England) Regulations 2019)
- DfE (2026) 'Allergy safety in schools'
- DfE (2026) 'Children's Wellbeing and Schools Act' (Benedict's Law)

This policy will be implemented in conjunction with the following school policies and documents:

- Health and Safety Policy
- Administering Medication Policy
- Supporting Pupils with Medical Conditions Policy
- Educational Visits and School Trips Policy

## 2. Definitions

For the purpose of this policy:

**Allergy** – is a condition in which the body has an exaggerated response to a substance. This is also known as hypersensitivity.

**Allergen** – is a normally harmless substance that triggers an allergic reaction for a susceptible person.

**Allergic reaction** – is the body's reaction to an allergen and can be identified by, but not limited to, the following symptoms:

- Hives
- Generalised flushing of the skin
- Itching and tingling of the skin
- Tingling in and around the mouth
- Burning sensation in the mouth
- Swelling of the throat, mouth or face
- Feeling wheezy
- Abdominal pain
- Rising anxiety
- Nausea and vomiting
- Alterations in heart rate
- Feeling of weakness

**Anaphylaxis** – is also referred to as anaphylactic shock, which is a sudden, severe and potentially life-threatening allergic reaction. This kind of reaction may include the following symptoms:

- Persistent cough
- Throat tightness

- Change in voice, e.g. hoarse or croaky sounds
- Wheeze (whistling noise due to a narrowed airway)
- Difficulty swallowing/speaking
- Swollen tongue
- Difficult or noisy breathing
- Chest tightness
- Feeling dizzy or faint
- Suddenly becoming sleepy, unconscious or collapsing
- For infants and younger pupils, becoming pale or floppy

### 3. Roles and responsibilities

The governing body is responsible for:

- Ensuring that policies, plans, and procedures are in place to support pupils with allergies and those who are at risk of anaphylaxis and that these arrangements are sufficient to meet statutory responsibilities and minimise risks.
- Ensuring that the school's approach to allergies and anaphylaxis focusses on, and accounts for, the needs of each individual pupil.
- Ensuring that staff are properly trained to provide the support that pupils need, and that they receive allergy and anaphylaxis training at least annually.
- Monitoring the effectiveness of this policy and reviewing it on an annual basis, and after any incident where a pupil experiences an allergic reaction.

The headteacher is responsible for:

- The development, implementation and monitoring of this policy and related policies.
- Ensuring that parents/carers are informed of their responsibilities in relation to their child's allergies.
- Ensuring that all relevant risk assessments, e.g. to do with food preparation, have been carried out and controls to mitigate risks are implemented.
- Ensuring that all designated first aiders are trained in the use of adrenaline auto-injectors (AAIs) and the management of anaphylaxis.
- Ensuring that all staff members are provided with information regarding allergic reactions and anaphylaxis, including the necessary precautions and how to respond.
- Ensuring that catering staff are aware of pupils' allergies and act in accordance with the school's policies regarding food and hygiene, including this policy.

The Special Educational Needs and Disabilities Coordinator (SENCO) is responsible for:

- Ensuring that there are effective processes in place for medical information to be regularly updated and disseminated to relevant staff members, including supply and temporary staff.
- Seeking up-to-date medical information about each pupil via a medical form sent to parents/carers on an annual basis, including information regarding any allergies.
- Contacting parents/carers for required medical documentation regarding a pupil's allergy.
- The SENCO will act as the school's Designated Allergy Lead and will oversee:

- Healthcare plans
- An up-to-date Allergy Register
- Staff awareness and training
- Emergency medication audits
- Incident monitoring

All staff members are responsible for:

- Attending relevant training regarding allergens and anaphylaxis.
- Being familiar with and implementing pupils' individual healthcare plans (IHPs) as appropriate.
- Responding immediately and appropriately in the event of a medical emergency.
- Reinforcing effective hygiene practices, including those in relation to the management of food.
- Monitoring all food supplied to pupils by both the school and parents/carers.
- Ensuring that pupils do not share food and drink in order to prevent accidental contact with an allergen.

Kitchen staff are responsible for:

- Monitoring the food allergen log and allergen tracking information for completeness.
- Reporting any non-conforming food labelling to the supplier, where necessary.
- Ensuring the practices of kitchen staff comply with food allergen labelling laws and that training is regularly reviewed and updated.
- Recording incidents of non-conformity, either in allergen labelling, use of ingredients or safe staff practice, in an allergen incident log.
- Acting on entries to the allergen incident log and ensuring the risks of recurrence are minimised.
- Ensuring they are fully aware of the rules surrounding allergens, the processes for food preparation in line with this policy, and the processes for identifying pupils with specific dietary requirements.
- Ensuring they are fully aware of whether each item of food served contains any of the main 14 allergens, as is a legal obligation, and making sure this information is readily available for those who may need it.
- Ensuring that the required food labelling is complete, correct, clearly legible, and is either printed on the food packaging or attached via a secure label.
- Reporting to the kitchen manager if food labelling fails to comply with the law.

All parents/carers are responsible for:

- Notifying the school of their child's allergens, the nature of the allergic reaction, what medication to administer, specified control measures and what can be done to prevent the occurrence of an allergic reaction.
- Keeping the school up-to-date with their child's medical information.
- Providing the school with written medical documentation, including instructions for administering medication as directed by the child's doctor.
- Raising any concerns they may have about the management of their child's allergies with the classroom teacher.

All pupils are responsible for:

- Ensuring that they do not exchange food with other pupils.
- Avoiding food which they know they are allergic to, as well as any food with unknown ingredients.
- Notifying a member of staff immediately in the event they believe they are having an allergic reaction, even if the cause is unknown, or have come into contact with an allergen.

## **4. Food allergies**

Parents/carers will provide the school with a written list of any foods that their child may have an adverse reaction to, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

Information regarding all pupils' food allergies will be collated, indicating whether they consume a school dinner or a packed lunch, and this will be passed on to the school's catering service.

When making changes to menus or substituting food products, the school will ensure that pupils' special dietary needs continue to be met by:

- Checking any product changes with all food suppliers
- Asking caterers to read labels and product information before use
- Using the Food Standards Agency's allergen matrix to list the ingredients in all meals.
- Ensuring allergen ingredients remain identifiable.

Kitchen staff will have a full list of allergens and will avoid using them within the menu where possible. The use of food containing nuts will always be avoided.

The school will ensure that there are always dairy- and gluten-free options available for pupils with allergies and intolerances.

To ensure that catering staff can appropriately identify pupils with dietary needs, pupils will wear blue wristbands that show they have a food allergy/dietary requirement.

All food tables will be disinfected before and after being used.

Anti-bacterial wipes and cleaning fluid will be used.

Boards and knives used for fruit and vegetables will be a different colour to the rest of the kitchen knives in order to remind kitchen staff to keep them separate.

Any sponges or cloths that are used for cleaning will be colour-coded according to the areas that they are used to clean, e.g. a red sponge for an area which has been used for raw meat, to prevent cross-contamination.

There will be a set of kitchen utensils that are only for use with the food and drink of the pupils at risk.

There will also be a set of kitchen utensils with a designated colour. These utensils will be used only for food items that contain bread and wheat related products.

Food items containing bread and wheat will be stored separately.

The chosen catering service of the school is responsible for ensuring that the school's policies are adhered to at all times, including those in relation to the preparation of food, taking into account any allergens.

Additionally, the school adheres to the following Department of Health guidance recommendations:

- Bottles, other drinks and lunch boxes provided by parents/carers for pupils with food allergies should be clearly labelled with the name of the child for whom they are intended.
- Where food is provided by the school, staff should be educated about how to read labels for food allergens and instructed about measures to prevent cross contamination during the handling, preparation and serving of food. Examples include preparing food for children with food allergy first, and careful cleaning (using warm, soapy water) of food preparation areas and utensils.
- Food should not be given to primary school aged food-allergic children without parental engagement and permission e.g., birthday treats.
- Foods containing nuts are discouraged from being brought into school through parent/carer information meetings when starting school, regular reminders and signage around school.
- Use of food in crafts, design and technology lessons, experiments and special events need to be considered and any need to be restricted or risk assessed depending on the allergies of particular children and their age.

Class teachers will discuss with the parents/carers of a child with an allergy whether it would be appropriate to set up a 'treat box' for them with checked, safe food/treats in the event of any food or treats being given out to children not being suitable e.g., Christmas time or birthdays.

## **5. Animal allergies**

Pupils with known allergies to specific animals will have restricted access to those that may trigger a response.

In the event of an animal on the school site, staff members will be made aware of any pupils to whom this may pose a risk and will be responsible for ensuring that the pupil does not come into contact with the specified allergen.

The school will ensure that any pupil or staff member who comes into contact with the animal washes their hands thoroughly to minimise the risk of the allergen spreading.

## **6. Seasonal allergies**

The term 'seasonal allergies' refers to common outdoor allergies, including hay fever and insect bites.

Precautions regarding the prevention of seasonal allergies include ensuring that grass within the school premises is not mown whilst pupils are outside.

Pupils with severe seasonal allergies will be provided with an indoor supervised space to spend their break and lunchtimes in, avoiding contact with outside allergens.

Staff members will monitor pollen counts, making a professional judgement as to whether the pupil should stay indoors.

Pupils will be encouraged to wash their hands after playing outside.

Pupils with known seasonal allergies are encouraged to bring an additional set of clothing to school to change in to after playing outside, with the aim of reducing contact with outdoor allergens, such as pollen.

Staff members will be diligent in the management of wasp, bee and ant nests on school grounds and in the school's nearby proximity, reporting any concerns to the site manager.

The site manager is responsible for ensuring the appropriate removal of wasp, bee and ant nests on and around the school premises.

Where a pupil with a known allergy is stung or bitten by an insect, medical attention will be given immediately.

## **7. Allergy Register**

The school maintains a live Allergy Register containing all pupils diagnosed with allergies requiring medical management.

The register includes:

- allergens
- severity
- prescribed medication
- healthcare plan
- emergency contacts
- location of medication

The register is reviewed at least termly and whenever medical information changes.

## **8. Adrenaline auto-injectors (AAIs)**

Pupils who suffer from severe allergic reactions may be prescribed an AAI for use in the event of an emergency.

All staff have access to AAI devices, but these are out of reach and inaccessible to pupils – AAI devices are not locked away where access is restricted.

In line with manufacturer's guidelines, all AAI devices are stored at room temperature in line with manufacturer's guidelines, protected from direct sunlight and extreme temperature.

Any used or expired AAIs are disposed of after use in accordance with manufacturer's instructions.

Used AAIs may also be given to paramedics upon arrival, in the event of a severe allergic reaction, in accordance with this policy.

A sharps bin is utilised where used or expired AAIs are disposed of on the school premises.

Where any AAIs are used, the following information will be recorded on Medical Tracker:

- Where and when the reaction took place
- How much medication was given and by whom

### **School-held Spare Adrenaline Auto-Injectors**

In accordance with Benedict's Law and the Department for Education's Allergy Safety in Schools guidance, Ordsall Primary School maintains a supply of spare Adrenaline Auto-Injectors (AAIs) for emergency use.

These devices are intended for pupils:

- diagnosed as being at risk of anaphylaxis;
- where parental consent has been obtained;
- where their prescribed AAI is unavailable, inaccessible, damaged or ineffective;
- or where immediate treatment is required whilst a prescribed device is being retrieved.

The school currently maintains:

- Jext 150 micrograms
- Jext 300 micrograms

The school's spare AAIs are:

- stored securely in clearly identified medication points across the school;
- clearly labelled;
- accessible within five minutes;
- checked monthly;
- recorded on an audit log;
- replaced before expiry.

## **9. School trips**

The headteacher will ensure a risk assessment is conducted for each school trip to address pupils with known allergies attending. All activities on the school trip will be risk assessed to see if they pose a threat to any pupils with allergies and alternative activities will be planned where necessary to ensure the pupils are included.

The school will speak to the parents/carers of pupils with allergies where appropriate to ensure their co-operation with any special arrangements required for the trip.

A designated adult will be available to support the pupil at all times during a school trip.

If the pupil has been prescribed an AAI, at least one adult trained in administering the device will attend the trip. The pupil's medication will be taken on the trip and stored securely – if the pupil does not bring their medication, they will not be allowed to attend the trip.

A member of staff will be assigned responsibility for ensuring that the pupil's medication is carried at all times throughout the trip.

Two AAI's will be taken on the trip and will be easily accessible at all times.

Where the venue or site being visited cannot assure appropriate food can be provided to cater for pupils' allergies, the pupil will take their own food or the school will provide a suitable packed lunch.

## **10. Medical attention and required support**

Once a pupil's allergies have been identified, a meeting will be set up with the pupil's parents/carers to discuss the pupil's allergies and create a plan of appropriate action/support.

All medical attention, including that in relation to administering medication, will be conducted in accordance with the Administering Medication Policy and the Supporting Pupils with Medical Conditions Policy.

Parents/carers will provide the school with any necessary medication, ensuring that this is clearly labelled with the pupil's name, class, expiration date and instructions for administering it.

Pupils will not be able to attend school or educational visits without any life-saving medication that they may have, such as AAI's.

All members of staff involved with a pupil with a known allergy are aware of the location of emergency medication and the necessary action to take in the event of an allergic reaction.

Any specified support which the pupil may require will be outlined in their IHP.

All staff members providing support to a pupil with a known medical condition, including those in relation to allergens, will be familiar with the pupil's IHP.

The SEND Manager and SENCO are responsible for working alongside relevant staff members, parents/carers, the pupil (where appropriate) and relevant healthcare professionals in order to develop IHPs for pupils with allergies, ensuring that any necessary support is provided and the required documentation is completed, including risk assessments being undertaken.

The SENCO has overall responsibility for ensuring that IHPs are implemented, monitored and communicated to the relevant members of the school community.

## **11. Staff training**

Designated staff members will be trained in how to administer an AAI, and the sequence of events to follow when doing so.

In accordance with the Supporting Pupils with Medical Conditions Policy, staff members will receive appropriate training and support relevant to their level of responsibility, in order to assist pupils with managing their allergies. This includes training on:

- Recognising allergic reactions
- Recognising anaphylaxis
- Administering AAI's
- Emergency response procedures
- Individual pupil healthcare plans where required

The relevant members of staff will be trained on how to consistently and accurately trace allergen-containing food routes through the school, from supplier delivery to consumption.

Designated staff members will be taught to:

- Recognise the range of signs and symptoms of severe allergic reactions.
- Respond appropriately to a request for help from another member of staff.
- Recognise when emergency action is necessary.
- Administer AAIs according to the manufacturer's instructions.
- Make appropriate records of allergic reactions.

All staff members will:

- Be trained to recognise the range of signs and symptoms of an allergic reaction.
- Understand how quickly anaphylaxis can progress to a life-threatening reaction, and that anaphylaxis can occur with prior mild to moderate symptoms.
- Understand that AAIs should be administered without delay as soon as anaphylaxis occurs.
- Understand how to check if a pupil is on the Register of AAIs.
- Understand how to access AAIs.
- Understand who the designated members of staff are, and how to access their help.
- Understand that it may be necessary for staff members other than designated staff members to administer AAIs, e.g. in the event of a delay in response from the designated staff members, or a life-threatening situation.
- Be aware of how to administer an AAI should it be necessary.
- Be aware of the provisions of this policy.

## **12. Mild to moderate allergic reaction**

Mild to moderate symptoms of an allergic reaction include the following:

- Swollen lips, face or eyes
- Itchy/tingling mouth
- Hives or itchy skin rash
- Abdominal pain or vomiting
- Sudden change in behaviour

If any of the above symptoms occur in a pupil, the nearest adult will stay with the pupil and refer to their IHP to determine appropriate next steps.

The pupil's parents/carers will be contacted immediately if a pupil suffers a mild to moderate allergic reaction, and if any medication has been administered.

In the event that a pupil without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered, should one be available. An AAI will not be administered in these situations without contacting the emergency services.

For mild to moderate allergy symptoms, the pupil's IHP will be followed and the pupil will be monitored closely to ensure the reaction does not progress into anaphylaxis.

Should the reaction progress into anaphylaxis, the school will act in accordance with this policy. Where the pupil is required to go to the hospital, an ambulance will be called.

### **13. Managing anaphylaxis**

In the event of anaphylaxis, the nearest adult will lay the pupil flat on the floor and try to ensure the pupil suffering an allergic reaction remains as still as possible; if the pupil is feeling weak, dizzy, appears pale and is sweating their legs will be raised. A designated staff member will be called for help and the emergency services contacted immediately. The designated staff member will administer an AAI to the pupil.

Where there is any delay in contacting designated staff members, the nearest staff member will administer the AAI.

If necessary, other staff members may assist the designated staff members with administering AAIs.

A member of staff will stay with the pupil until the emergency services arrive – the pupil will remain lying flat and still. If the pupil's condition deteriorates after initially contacting the emergency services, a second call will be made to ensure an ambulance has been dispatched.

The headteacher will be contacted immediately, as well as a suitably trained individual, such as a first aider.

If the pupil stops breathing, a suitably trained member of staff will administer CPR.

If there is no improvement after five minutes, a further dose of adrenaline will be administered using another AAI, if available.

In the event that a pupil without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered, should one be available. An AAI will not be administered in these situations without contacting the emergency services.

A designated staff member will contact the pupil's parents/carers as soon as is possible.

Upon arrival of the emergency services, the following information will be provided:

- Any known allergens the pupil has
- The possible causes of the reaction, e.g. certain food
- The time the AAI was administered – including the time of the second dose, if this was administered

Any used AAIs will be given to paramedics.

Staff members will ensure that the pupil is given plenty of space, moving other pupils to a different room where necessary.

Staff members will remain calm, ensuring that the pupil feels comfortable and is appropriately supported.

A member of staff will accompany the pupil to hospital in the absence of their parents/carers.

If a pupil is taken to hospital by ambulance, two members of staff will accompany them if a parent/carer is not present.

A copy of the Register of AAIs will be held in each classroom for easy access in the event of an allergic reaction.

Following the occurrence of an allergic reaction, the SENCO and SEND Manager will review the adequacy of the school's response and will consider the need for any additional support, training or other corrective action.

### **Recording, Monitoring and Learning from Incidents**

All allergy-related incidents, suspected allergic reactions, administration of medication and allergy near misses will be recorded in accordance with school procedures – either through CPOMS or Medical Tracker.

Following any incident or near miss, the school will review:

- Individual Healthcare Plans
- Risk assessments
- Staff training requirements
- Wider school procedures where appropriate

Lessons learned will be used to strengthen allergy management arrangements and reduce future risk.

## **14. Monitoring and review**

The headteacher is responsible for reviewing this policy annually.

The effectiveness of this policy will be monitored and evaluated by all members of staff. Any concerns will be reported to the headteacher immediately.

Following each occurrence of an allergic reaction, this policy and pupils' IHPs will be updated and amended as necessary.
